

Are the Same Features Always the Most Important?

Absolute Feature Importance (SHAP) Compared, by Combination Method

$\chi^2_{\text{Friedman}}(4) = 9.32, p = 0.05, \widehat{W}_{\text{Kendall}} = 0.12, \text{CI}_{95\%} [0.02, 1.00], n_{\text{pairs}} = 20$
